SCAN CLEAR ALERT

MEDIA SCREENING & CHAIN-OF-CUSTODY REPORT

CSAM MATCH - LAW ENFORCEMENT ACTION REQUIRED

Known-file hash identity match against the loaded list — not a legal finding. No image was opened or shown. Follow your agency's mandatory-reporting and evidence-handling procedures.

SCAN DETAILS

Screening Unit	**DF-X1 Forensic Console**	Unit Serial	d3b59bac07c8812c
Date / Time	**17:21:18 UTC · 2026-10-06**	Scan #	#000155
Operator ID	UNASSIGNED	Media Type	**Apple device**
Files Scanned	**1,145**	Scan Size	—
Device	**Apple iPhone12,8 · iOS 26.6**	Scan Mode	**Deep**
Search Authority	**Whole device (messages, app data) - confirmed by the operator in the app**	Device Backup	**complete · 1,121 files · 248 MB · streamed and hashed, nothing stored**

FINDINGS

FINDING	DETAIL	RESULT
CSAM known-file match	2 file(s) matched the loaded known-file list (BENCH test list (harmless test images, 5 Oct))	CSAM MATCH

KNOWN-FILE MATCH (CSAM)

Matched Files	**2**	Highest Category	—
Hash List	**BENCH test list (harmless test images, 5 Oct)**	List Loaded	—

Identity match: each matched file produced a hash identical to an entry in the loaded known-file list. Not a legal finding. No file content was opened or shown. Examiner action per agency mandatory-reporting and evidence-handling procedures.

DEVICE INTEGRITY

READ-ONLY ACCESS

The device was examined over its trusted USB connection: device details were read and the camera roll was opened read-only and streamed for hashing. Nothing was written to or installed on it and no files were copied to the DF-X1. No before/after hash: a powered-on device changes on its own, so a whole-device hash is not possible.

Changes made to the device	**Trust pairing created with this DF-X1; iOS recorded this scan as its last computer backup (813000080)**

NOT COVERED

- App-private chats and app storage
- iCloud-only photos
- Similar-image matching of HEIC photos (exact matching covers them)
- Malware check (iPhone apps cannot be read over USB)
